I'll talk to you in the morning re the FOIA meeting. The bottom line is, we should follow the procedure outlined by ORC which I sent to you today.

Ivry - Most responsive documents for this one will be in Outlook. As you know, that search process is on hold pending direction from SMT and ORC, potentially as soon as this afternoon. However, nobody is seeking any extension from the requestor, yet. HQ folks will almost certainly have responsive documents (potentially up to and including the Administrator's office). I think it would make sense for you to coordinate with the HQ FOIA office, and then let us know how best to identify those records (i.e. who has lead). Thanks - Jason

There has not been any coordination through my office, usually someone would let me know a POC in HQ's in order to make an assignment. Also I was not informed to put this on hold. Has the requestor been contacted and informed there will be a delay in response?

Ivry Johnson
FOIA Officer, Region 9

Agreed. Given the Outlook search problem, this has been on hold anyway...

Ivry, while we're waiting, what was the HQ coordination on document search for this FOIA?

Way I read this request is it applies to communications from/to all EPA offices. Surprised that the Region 9 FOIA office has not contacted the HQ FOIA office to set up a task for HQ to complete on document search. I know we haven't been asked to do anything yet on this, nor has the request showed up in our FOIA in box. Just letting your know.

Just FYI for now. R9 ORC and my lead staff are working out process for gathering responsive materials. It's time-limited to 2014 docs. This is from the applicant's counsel, whom you will recognize...
